

# Birthplace Of The Next Generation Of The World's Most Advanced Presses.

The new TKS press factory in Kazusa, Japan

Our new press factory is just one example of TKS's commitment to the future. By investing in tomorrow's press needs today, we're insuring that, along with our presses, TKS itself is built to last. Signs of our unequalled commitment to the market are:

- Building a new state-of-the-art factory to provide more efficient manufacturing capability
- Refurbishing a second factory for added manufacturing capacity
- Increasing R&D initiatives by added tools, space and on-site team
- Improving integration of key departments: Engineering/Design and R&D
- Speeding-up the response times for engineering innovations to market

Call TKS now to hear more about our plans for making a press and a company that's built to last.
