

Who Benefits From TKS's New Line Of Environmentally-Friendly Presses? All Of Us.

COLORTOP® ECOWIDE (4 X 1)

- Uses less electricity than conventional style presses
- Uses 50% less plates than 4 x 2 style presses
- Less weight than older style 4 x 2 presses
- Uses a 1:1 plate to blanket ratio, better print quality
- Utilizes narrow gaps in plate and blanket cylinders
- Incorporates TKS full bearer to bearer technology
- Utilizes conventional blankets

COLORTOP® ECOPRIUS (4 X 2)

- Uses less electricity than conventional style presses
- Uses less paper because of reduced cutoff
- Uses a smaller plate, less material cost on the plates
- Less weight than conventional style presses

New State-of-the-Art Factory

- Construction completed in 2010

In the business world today, the word "Environmentally-Friendly" has become synonymous with conserving energy, material resources and impacting the planet in a positive way. At TKS, we take all these initiatives seriously and have committed ourselves to developing tomorrow's solutions today with our Eco-Smart presses: the Ecowide and the Ecoprius.

The Ecowide and the Ecoprius conserve the environment by using less electricity, smaller plates and less paper. By conserving raw materials, you reduce the energy needed to retrieve, process and manufacture them. And environmental conservation makes good business sense—your pressroom can save money through improved energy efficiency and reduced purchasing of materials.

Call today to learn how we can all benefit from TKS's Eco-Smart Presses.
